## About me

**Senior Java Developer** with **over 6 years** of experience in the telecommunications industry in creating and developing backend applications in microservice architecture. Commercially working in **Java** with **Spring Boot**. I actively share knowledge with the team, participate in design processes and take care of the quality, testability and efficiency of the code. Open to new technologies. Thanks to the use of **AI**, I also develop outside the JVM environment.

## Education

### Master's degree

2012 - 2013

*Field of study: Electronics and Telecommunications  
University: West Pomeranian University of Technology in Szczecin*

### Bachelor of Engineering

2008 - 2012

*Field of study: Electronics and Telecommunications  
University: West Pomeranian University of Technology in Szczecin*

### Electronics Technical School

2004 - 2008

*Obtaining the diploma of Electronics Technician  
Electrical and Electronic School Complex named after prof. M. T. Huber in Szczecin*

## Professional experience

### Senior Java Developer

*intive GmbH Sp z o. o. branch in Poland*

2022 - present

### Java Developer

*intive GmbH Sp z o. o. branch in Poland*

2019 - 2022

### Junior Java Developer

*intive GmbH Sp z o. o. branch in Poland*

2018 - 2019

Work in a project involving the creation and development of backend applications for one of the **leaders in the telecommunications industry in Poland**.

#### Scope of duties:

- Design, development and maintenance of **Java + Spring Boot** backend applications deployed on the **OpenShift** environment
- Dividing and migrating monoliths to a **microservices architecture**
- Migrating systems to newer versions (Java 8>11>17, Spring Boot 2>3)
- Integrations with other systems using **REST** and **SOAP**
- Creating unit, integration and e2e tests (**JUnit**, **Mockito**, **Pact**)
- Taking care of code quality by doing **code review** and quality monitoring using **SonarQube**
- Analysis of system operation based on **Prometheus**, **Grafana**, **ELK**
- Working with **Oracle** and **PostgreSQL** databases
- Handling and resolving support tickets based on **JIRA** tickets and **Confluence** documentation
- Working with code management tools like **Git** and **GitLab**
- Onboarding and internal trainingsn for people joining the project
- Close cooperation with team members and the client

## Certificates and training

### 10xDevs - Using Generative AI in Software Development (Certificate with Distinction)

2025

*Issued by: Przeprogramowani*

### Why is hacking apps so easy?

2025

*Issued by: Sekurak*

### Introduction to OpenShift Applications (DO101)

2020

*Issued by: Red Hat*
